PROJECTS

Online Job Finder Website

Developed a responsive web application that allows job seekers to browse and apply for job listings. Implemented using Figma for UI, HTML, CSS, JavaScript, Django, Tailwind CSS, Bootstrap, and SQLite for backend data management.

Hospital Management System (Receptionist Module)

Built a receptionist-facing interface to manage patient appointments and records. Developed using Figma for UI, HTML, CSS, JavaScript, Tailwind CSS, Flask framework, and SQLite for database handling.

Coffee Shop Website

Created a visually appealing static website for a coffee shop, featuring menu display, image galleries, and contact forms. Designed using HTML, CSS, and JavaScript.

QR Code Generator

Designed a simple tool to generate QR codes dynamically using HTML, CSS, JavaScript, and external API integration.

To-Do List Application

Developed a basic task management app with functionalities to add, update, and delete tasks. Built using HTML, CSS, and JavaScript.
